- Check the weather forecast and tell someone your route and return time before you set off.
- Download the GPX track and an offline map — there is often no signal in the mountains.
- Take water, warm clothes, a rain jacket, a torch and a charged power bank.
- Turn back if the weather turns: the mountain will still be there.

Times and distances are estimates: driving from GraphHopper/OpenStreetMap, walking at 4 km/h + 1 h per 600 m of ascent.
